

VARSHINI M

Bhimavaram, Andhra Pradesh, India

+91 7488433017 | varshini2419@gmail.com | linkedin.com/in/maddala-varshini | github.com/varshini2419

Professional Summary

Third-year B.Tech student in Computer Science & IT with hands-on experience building AI-integrated full-stack systems using Python, JavaScript, React.js, Node.js, and MongoDB. Designed and deployed production-ready applications including a facial-recognition attendance system and an AI-powered campus intelligence platform (IEEE Hackathon). Proficient in data structures, REST API design, and multi-system integration. Seeking a Google SWE Internship to contribute to large-scale, high-impact engineering challenges.

Education

SRKR Engineering College

Bachelor of Technology – Computer Science & Information Technology

2024 – 2028

Bhimavaram, AP, India

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS, Java (Basics)

Frameworks & Libraries: React.js, Node.js, Express.js, Pandas, NumPy, OpenCV, Matplotlib

Databases & Tools: MongoDB, PostgreSQL, MySQL, Git, GitHub, Power BI, VS Code

AI & Cloud: Gemini AI API, REST APIs, Google Cloud (Basics), ChatGPT API

Projects

AI Student Attendance System | *Python, OpenCV, React.js, Node.js, Express, MongoDB*

2026

- Architected a full-stack AI system using facial recognition (OpenCV) for real-time webcam-based attendance tracking, with RESTful Node.js/Express backend, MongoDB persistence, and role-based access control serving 100+ students.
- Built React.js frontend with live video stream processing and automated Excel report generation; reduced manual attendance effort by eliminating paper-based processes entirely.
- github.com/varshini2419/Student-attendance-system

SmartCampus AI – Campus Intelligence Platform | *React.js, Node.js, MongoDB, Python, Gemini AI*

2025

- Designed a scalable, distributed campus management platform at IEEE CIS Webathon (team Innovera) integrating attendance, academic analytics, and wellness tracking using React.js frontend and Node.js/Express microservices.
- Integrated Gemini AI API for natural language querying across multi-dimensional datasets; pitched system architecture and scalability strategy to national-level judges.

Nykaa Marketing Campaign Analytics Pipeline | *Python, Pandas, SQL, Power BI*

2026

- Built an end-to-end data pipeline with Python/Pandas to ingest, clean, and transform campaign datasets; wrote complex SQL for cohort analysis and channel-wise KPI aggregation.
- Delivered interactive Power BI dashboard tracking impressions, conversions, and ROI, enabling actionable marketing spend decisions.
- github.com/varshini2419/Nykaa-Marketing-Campaign-Performance-Analysis

HR Analytics Dashboard | *SQL, Power BI, Power Query*

2026

- Developed an interactive HR intelligence dashboard analyzing attrition, satisfaction, and salary trends across 1,000+ employee records using SQL pipelines and Power BI KPI visualizations.

Experience

BO Foods & NutriDelight Startup

2025 – 2026

Content Creator & Designer

Bhimavaram, Andhra Pradesh, India

- Automated digital content pipelines using AI generation tools; collaborated cross-functionally to align technical deliverables with business goals.

Certifications

SQL (Advanced) – HackerRank
Simplilearn

Introduction to Generative AI – Google Cloud

Power BI for Beginners –

Leadership & Extracurricular

IEEE CIS Smart Campus Webathon

2025

Hackathon Participant – Team Innovera

Manipal University Jaipur (National)

- Designed and pitched SmartCampus AI, an AI-integrated campus intelligence platform with distributed full-stack architecture, to national-level judges.

Language Nest Club & Startup Club

2024 – Present

D&D Member | Content & Design Lead

SRKR Engineering College

- Led content strategy and design execution for club events; developed communication and cross-team coordination skills through structured debates and outreach initiatives.
