Professional Summary

Computer Science undergraduate with hands-on experience in software development, real-time web applications, databases, and data analysis. Built practical systems that solve real-world problems, including an internship attendance management system used for daily attendance tracking and a real-time multiplayer Housie game successfully tested with 170 participants. Skilled in building end-to-end applications using modern web technologies and databases.

Education

Sagi Rama Krishnam Raju Engineering College

2024 – 2028

Bachelor of Technology in Computer Science / Information Technology

Bhimavaram, Andhra Pradesh

Projects

Real-Time Housie / Tambola Game Platform | React, Node.js, Express.js, Socket.IO, MongoDB

2026

GitHub | Live Demo

- Developed a real-time multiplayer Housie/Tambola web application supporting live number generation, synchronized game updates, countdown functionality, ticket management, and prize claiming.
- Implemented real-time client-server communication using Socket.IO to synchronize game events and updates across connected participants.
- Designed separate game management and player interaction workflows to support administration and smooth multiplayer gameplay.
- Successfully tested the application with **170 participants**, validating the system's ability to handle a large real-world multiplayer game session.

Internship Attendance Management System | React, Node.js, Express.js, MongoDB, Python

2026

GitHub | Live Demo

- Developed an attendance management system to solve the problem of tracking and managing daily attendance for internship students.
- Designed the system to record attendance information and manage student attendance records through a centralized digital platform.
- Built an end-to-end application integrating frontend interfaces, backend services, and database management for handling attendance-related operations.
- Created the project for a practical use case involving **daily attendance tracking for internship students**, replacing inefficient manual processes.

Technical Skills

Programming Languages: Python, SQL

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Data & Analytics: Power BI, DAX, Power Query, Microsoft Excel, Pandas, NumPy, Matplotlib

Real-Time & Backend: Socket.IO, REST APIs

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Certifications & Achievements

Certifications: Advanced SQL (HackerRank) · SQL Intermediate (HackerRank) · Power BI for Beginners · Introduction to Generative AI

Achievement: Real-Time Housie Platform — successfully tested with 170 participants
